

# Exercise 1

Fredrik Kortetjarvi & Rohullah Khorami

January 20, 2021

## 1

Citoday breach this contains 226,883,414 accounts. The breach used socail engineering to get the information they used mailinator to mail fake mails to users in a guitar forum there it could send out. This kind of breaches cant be stoped becasue this is using tricks to trick the brain of people so they give out the information for free. this can only be improved but not fixed.[1]

## 2

The program generate a picture with a name IOCCC in raytracing. We used cmake to make this into a ppm file then display it in gimp to see the picture that was created. We found the makefile on the internet which was a programming contest. The program use functions to make a program to draw graphics into a ppm file that is a picture.[2]

## 3
